OVERVIEW

This is not a legal document and employers are advised to seek legal advice.

Employers have obligations to protect workers from hazards in the workplace as set out in the Occupational Health and Safety Act (OHSA) and its regulations as well as the directives coming from the Chief Medical Officer of Health.

Workers should raise any concerns to their:

- Supervisor
- Joint Health and safety Committee
- Health and Safety Representative

This will help ensure the employer has taken all reasonable precautions.

Ontario is currently in the midst of a global pandemic. While the COVID-19 situation is changing daily, the legislation and regulations used to govern Ontario’s workplaces remain in force.

Under Ontario law, employers have the duty to take every reasonable precaution to protect workers from hazards in the workplace. Workers have the right to refuse unsafe work. If health and safety concerns are not resolved internally, a worker can seek enforcement by filing a complaint with the Ministry’s Health and Safety Contact Centre at 1-877-202-0008. Failure of the employer to comply with the OHSA and its regulations could result in a stop-work order upon inspection by the Ministry of Labour, Training and Skills Development.
BEST PRACTICES TO KEEP YOUR WORKERS HEALTHY AND SAFE

The health and safety of workers is a top concern amid the global COVID-19 pandemic. During this time, all parties must place an increased focus on health and safety in order to protect the health and safety of workers and to keep childcare centres operations running and safe.

A potential source of exposure in child care centres is exposure between the children or their families – if any of them have been exposed to the virus. This can include close physical contact with the children or families during exercises, activities, conversations or other routine activities for a child care centre, as well as constant contact between child care providers internally. Also, exposure can also happen through touching possibly contaminated personal or shared items (such as mobile devices, toys, documents, personal clothing, etc.) or taking part in group events/activities happening at the child care centre.

All measures taken to prevent the spread of COVID-19 should be done in compliance with requirements under the OHSA and its regulations and the applicable public health directives issued by the Chief Medical Officer of Health.

In addition, below are a set of resources, tips and best practices to help employers prevent the spread of COVID-19 in workplaces.

PROTECTING YOURSELF AND CO-WORKERS-GENERAL GUIDANCE

The virus typically spreads through coughing and sneezing, personal contact with an infected person, or touching an infected surface and then face – mouth, nose or eyes. Here is some general guidance and helpful tips to help prevent the spread of germs:

- Maintain physical distancing of at least 2 metres (6 feet) or more between persons, including clients and co-workers. (see Physical Distancing)
- Promote good hygiene such as:
  - Wash your hands often with soap and water when hands are visibly soiled, before and after any breaks, at the beginning and end of their shift, and before preparing food or use alcohol-based hand sanitizer (with greater than 60% alcohol content) if hand washing is not possible.
  - Sneeze and cough into your sleeve.
  - If you use a tissue, discard immediately and wash your hands afterward.
  - Avoid touching your eyes, nose or mouth.
  - Avoid high-touch areas, where possible, or ensure you clean your hands after.
- Symptomatic children should be separated from others in a supervised area until they can go home and where possible anyone who is providing care to the child should maintain a distance of 2 metres; environmental cleaning of this space should take place following pick up of child.
- Instruct workers not to report to work if they are exhibiting any of the symptoms or are under self-isolation or quarantine.
- Implement regular cleaning and disinfection (see Environmental Cleaning and Disinfection).
Minimize contact with people who are sick and ensure controls are in place for the protection of workers.

Instruct workers to stay home if they are sick.

Where possible, wear gloves when interacting with high-touch areas. Do not touch your face with gloved hands. Take care when removing gloves. Ensure you wash your hands after removing them.

Wash your clothes as soon as you get home.

Instruct staff who have symptoms or think they were exposed to COVID-19, to notify their supervisor immediately, complete the self-assessment and follow the instructions provided.

ESTABLISH AN EFFECTIVE OCCUPATIONAL HEALTH AND SAFETY AND INFECTION PREVENTION AND CONTROL PLAN

Establish an infectious disease preparedness and response plan. The plan should follow recommendations in guidance notes from the Ministry of Health and directives from Public Health Ontario. The plan should consider and address levels of risk associated with the workplace and job tasks within the childcare centre and any office staff. This includes how the childcare centre will operate during and throughout the recovery phase following the pandemic including sanitization of the workplace, equipment and resources, how employees report illness, how to ensure social distancing and how work will be scheduled. This may also include limiting the number of children allowed in groups, rescheduling of group events and/or in-person meetings as well as determining need for distance learning or providing lesson plans to parents, if applicable.

To access the most recent Ministry of Health guidance notes please visit and scroll down to find your relevant sector information:

A list of activities and links to relevant resources to provide support in this area are listed below:

- Ensure all toys used at the centre are made of material that can be cleaned and disinfected
- In addition to routine cleaning, clean frequently touched surfaces (i.e. door handles, handrails, toys, touch screens, elevator buttons, etc.) using cleaning products registered in Canada with Drug Identification Number (DIN) and labelled as a broad-spectrum viricide at least twice daily and when soiled.
- Follow manufacturer’s instructions and Safety Data Sheet requirements for proper use of cleaning and disinfecting products. Particular attentions should be paid to contact time, dilution, material compatibility, shelf-life, storage, first aid, and PPE.
- Cleaning equipment itself requires careful and regular cleaning and disinfection to avoid inadvertent cross-transmission of microorganisms during subsequent use.
- If equipment barriers are used, ensure they are removed and discarded between uses.
When an employer determines personal protective equipment (PPE) is required for contact/droplet precautions (gown, gloves, mask/respirator and eye protection), workers must be trained on its use, care, limitations and fit testing must be completed if respirators are required.

When holding infants and toddlers use blankets or cloths over childcare providers clothing and change the blankets or cloths between children.

Linens must be laundered between children

Children must not share food, soothers, bottles, sippy cups, toothbrushes, facecloths etc. Label these items with the child’s name to discourage accidental sharing

Pick up and drop off of children should happen outside the childcare setting unless there is a determined need for the parent/guardian to enter the setting

Place posters or other signage in high traffic areas:
- Instructing parents to keep children home if they have symptoms (fever, cough or difficulty breathing)
- Encouraging good respiratory hygiene, hand hygiene, and other healthy practices at the entrance to the workplace. Consider hand sanitizer stations at these locations where possible.

Consider remote work for employees wherever and whenever possible.

Institute measures to physically separate or impose physical distance of at least 2 metres between persons. This could be done by use of physical partitions, visual cues or signage to limit close contact.

Provide training to workers on COVID-19, how it spreads, risk of exposure, including those who may be at higher risk (i.e. have underlying health conditions) and procedures to follow including reporting process, proper hand washing practices and other routine infection control precautions.

Ensure sick employees stay home and that sick leave policies are flexible and consistent with public health guidance. Communicate these policies to employees.

Based on risk of exposure, consider implementing a process for containing and laundering work clothing. Alternatively, advise workers to practice good laundry hygiene practices with their clothing as it could potentially be a source of contamination.

Have a system for reporting probable and confirmed cases to the local Public Health unit. Communication about who will take responsibility, ensuring proper documentation, and implementing any advice given by the Public Health unit is critical for containing the spread of COVID-19.

Assign staff to dedicated work areas as much as possible. Discourage them from sharing phones, desks, offices and other tools and equipment.

Limit the exchange of papers (e.g. signing contracts). If documents must be exchanged, leave them on a clean surface while maintaining a two-metre distance. Avoid sharing pens and office equipment. Disinfect after each use.

Schedule visits to eliminate people gathering in reception areas.

**PHYSICAL DISTANCING**

As advised by the Chief Medical Officer of Health, public health officials, and outlined throughout government communications, physical distancing is required to control the spread of COVID-19. Physical distancing generally means maintaining a distance of at least 2 metres (6 feet) or more between persons.
Safe Environments
Healthy Workers

By maintaining physical distancing, people are less likely to be exposed to a respiratory virus like COVID-19 as the virus can be spread before symptoms appear (pre-symptomatic) and when persons may have contracted the virus but are minimal or no symptoms (asymptomatic).

In order to ensure physical distancing in the workplace, employers should consider:

- Encourage physical space between children by spreading children out into different areas; staggering or alternating lunchtime and outdoor playtime and incorporating more individual activities or activities that encourage more space between children
- Do not use water or sensory tables
- Do not use community playgrounds; however outdoor play at licensed childcare sites is encouraged in small groups which facilitate physical distancing (check with local public health unit regarding use of playground equipment onsite)
- Increase distance between nap mats or if space is tight place children head to toe or toe to toe. Cots and cribs should be disinfected after each use.
- If unable to maintain physical distancing workers can use a non-medical mask to protect those around them
- Limiting the total number of workers onsite during child care centre hours and where they are assigned to work
- Consider implementing a system for virtual and/or telephone consultations when and where possible
- Non-essential face-to-face meetings should be postponed or converted to virtual appointments
- Have staff work from home whenever possible (i.e. administrative staff)
- Staggered start times, breaks and lunches where possible
- Restricting visitors and limiting workplace entry to only essential personnel
- Suspending all group activities and gatherings
- Alter the workplace layout of the floor by moving furniture or using visual cues such as tape on the floor to enhance physical distancing
- Lunchrooms and break rooms must be arranged to follow physical distancing practices. Consider staggered lunch and break times to reduce the number of employees gathering.

ENVIRONMENTAL CLEANING AND DISINFECTION

While employers always have an obligation to maintain clean workplaces, that obligation is under sharper focus during the COVID-19 outbreak.

The COVID-19 virus can survive for several days on different surfaces and objects. Frequent cleaning and disinfection is important to prevent spread of the disease. Many common household and commercial disinfectant products will destroy the COVID-19 virus. Some disinfectants will have an eight-digit Drug Identification Number (DIN). These products are approved for use by Health Canada. Refer to the Public Health Ontario Fact Sheet for Environmental cleaning for more details.
Employers should focus on:

- Easy access to soap and water (ways to properly clean hands) or alcohol-based hand sanitizer if soap and water are not available
- Frequent cleaning and disinfecting of washroom facilities.
- Posting signage on hygiene in English and majority languages in the workplace so everyone can understand how to do their part respecting hygiene practices.
- Sanitizing of commonly touched surfaces or areas (e.g. door handles, light switches, toilet handles, counters, work surfaces, equipment, toys) twice a day and when visibly soiled

**REPORTING ILLNESS**

The symptoms of COVID-19 are shared with many other illnesses including the cold and flu. At this time, it is recommended that anyone who begins to feel unwell (fever, new cough or difficulty breathing) should return home and self-isolate immediately. If you are a caregiver, have a household member, or a contact of someone who has COVID-19 you should follow the guidance from public health on self-isolation.

People who are self-isolating should seek clinical assessment over the phone - either by calling their primary care provider's office or Telehealth Ontario 1-866-797-0000. If you need additional assessment, your primary care provider or Telehealth Ontario will direct you to in-person care options.

Anyone who has travelled outside of Canada within the last 14 days should self-isolate upon return from travel and should not go to work.

Workers who have travelled and are part of workplaces that are essential to daily living are able to return to work as long as they do not have symptoms. However, they should self-monitor for a period of 14 days and identify themselves to their employer so that a plan can be put into place to ensure the protection of those workplaces.

**MINISTRY OF LABOUR, TRAINING AND SKILLS DEVELOPMENT AND WORKPLACE SAFETY & INSURANCE BOARD REPORTING REQUIREMENTS**

The OHSA requires an employer to provide a written notice within four days of being advised that a worker has an occupational illness (including COVID-19) from exposure in the workplace or if a claim has been made to the Workplace Safety and Insurance Board (WSIB) by or on behalf of the worker with respect to an occupational illness, including an occupational infection, to the:

- Ministry of Labour;
- Joint health and safety committee (or health and safety representative); and
- Trade union, if any.

For more information: [Occupational Illness: Requirements to Report to the Ministry of Labour](#)

Any instances of occupationally-acquired illnesses shall be reported to [WSIB](#) within 72 hours of receiving notification of said illness.
SHARE INFORMATION
It is important that all parties in a workplace understand their roles and responsibilities. Employers need to ensure health and safety policies are updated and posted for all employees to see. Using industry resources, including this one and those produced by Public Services Health and Safety Association (PSHSA), the Ministry of Health, and Public Health Ontario will improve workplace understanding.

POST YOUR POLICIES
All employers need to post and communicate COVID-19 policies to employees. These policies should cover how the workplace will operate, including but not limited to:

- The sanitization of workplaces
- How to ensure physical distancing
- How work will be scheduled
- How workers and contractors report illnesses

All businesses should have a workplace illness policy. If a policy does not currently exist or does not align with COVID-19 recommendations, the following should be included: Sick employees must stay home or be sent home from work; For employees housed in workplace accommodations, sick employees must be confined to their rooms until cleared for re-entry into the workforce; Sick employees should use the self-assessment tool for COVID-19 and follow the subsequent directions; When employees go home sick, their work areas must be cleaned and disinfected.

MINISTRY OF LABOUR TRAINING AND SKILLS DEVELOPMENT (MLTSD) REQUIREMENTS
The MLTSD is focused on providing enhanced protections for workers. Effective March 19, 2020, the Employment Standards Act was amended to provide job protected leaves for employees affected by COVID-19.

TRACK AND MONITOR YOUR WORKFORCE
Due to the latency period of COVID-19, it is important to track where workers have worked, where possible. If a worker tests positive for COVID-19, the local public health unit will ask employers to provide information on where the worker worked as well as the contact information of any other worker who may have been exposed.

EVALUATE
Ask and evaluate:

- Were the proper hygiene facilities (handwashing equipment) available to you?
- Were you able to practice social distancing?
Did you have the Personal Protective Equipment (PPE) you require to protect you while you do your job?
Have you been provided training on the proper use of PPE?
Do you know what to do if you have symptoms?
Are you aware of emergency risks in your region and how to prepare for different situations?

COVID-19 RESOURCES OF INTEREST TO EMPLOYERS

COVID-19 GOVERNMENT UPDATES
Stay updated with daily updates:

- [https://www.publichealthontario.ca/](https://www.publichealthontario.ca/) (Public Health Ontario)

ONTARIO GOVERNMENT 
This above link provides updates on Ontario’s response to COVID-19. This includes:

- status of cases in Ontario;
- current affected areas;
- symptoms and treatments;
- how to protect yourself and self-isolate; and
- updated Ontario news on the virus.

PUBLIC HEALTH ONTARIO 
Public Health Ontario is providing up-to-date resources on COVID-19, including:

- links to evolving public health guidelines, position statements, and situational updates;
- a synopsis of key articles updating on the latest findings related to the virus;
- recommendations for use of personal protective equipment;
- testing information; and,
- other public resources.
OTHER COVID-19 RESOURCES

PUBLIC HEALTH AGENCY OF CANADA

This link outlines the actions being taken by the Government of Canada to limit spread of COVID-19, as well as what is happening in provinces and communities across the country. It also maintains a live update of the number of cases by province.

WORLD HEALTH ORGANIZATION (WHO)

WHO provides the latest guidance and information related to the global outbreak and spread beyond Canadian borders.

It also provides the most up-to-date information on:

- current research and development around the virus
- a COVID-19 situation “dashboard”
- emergency preparedness measures; and,
- live media updates on the spread of the virus.

OTHER RESOURCES

There are a host of additional resources available to help address the ongoing COVID-19 outbreak that are aimed at the Social and Community Services workplaces. Resources include:

- Public Health Unit websites:
- Government of Canada, COVID-19 Taking Care of Your Mental Health:
- Childcare Guidance

PUBLIC SERVICES HEALTH AND SAFETY ASSOCIATION RESOURCES

- Occupational Illness: Infectious Disease Reporting Form:
  https://www.pshsa.ca/resources/occupational-illness-infectious-disease-reporting-form
