Navigating New Work Realities:

**Leading a Team Remotely “New”**
Managing a team remotely presents challenges to even the most seasoned Manager. Learn about maintaining efficiency, team morale, product & service cohesion, consistency in discipline and forming a productive team. There are big benefits to today’s virtual workplace, but there are also big challenges. This session will teach managers how to prepare employees for the virtual workplace, create telework programs, build virtual teams, leverage technology, and overcome work-flow barriers to create a successful virtual workplace. Tools for Working from Home “New”
Work-from-home environments are a relevant part of today’s workforce. They place a large emphasis on the technology, strategies and protocols needed to ensure productivity and data safety. This session will provide insight into the requirements for creating successful virtual workspaces. We will outline the responsibilities of both the employer & employee, examine tools, resources, and access levels, as well as how to establish routines and daily or ongoing expectations. Click here
